

“The Little Barn”, Step-by-step instructions. Marker sizes 01 and 005.

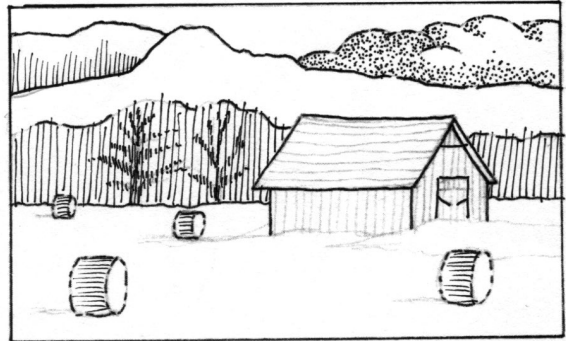

Simple outlines: start with the horizon, then the house and tree lines. Add a mountain line and some clouds.

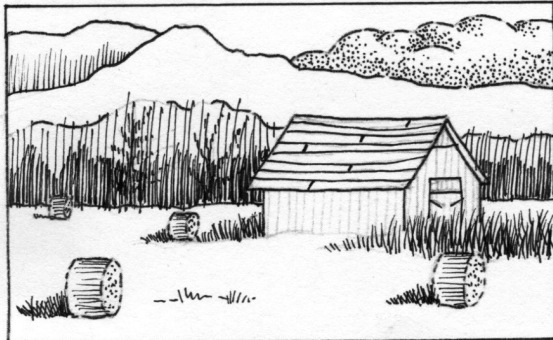

Add the hay bales with their shadows. Put in the wood panels of the barn.

Trace the horizon, the roof/walls of the barn and the mountain line with a continuous line. Use intermittent lines for the bales and tree line.

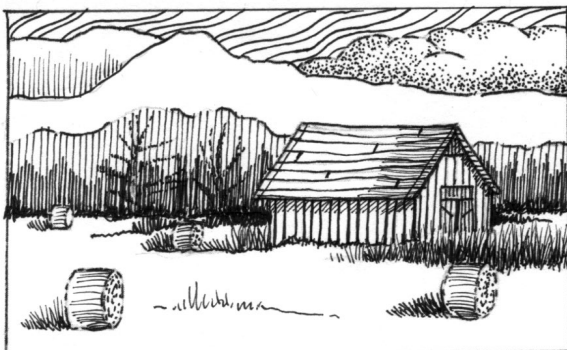

Parallel hatch the trees, the furthest mountain, the tree line and the bales' sides. Stipple the clouds. The light comes in from the right side.

Trace the roof panels. Parallel hatch an additional darker layer of trees. Stipple the front of the hay bales. Criss Cross the grass behind the bales and in front of the barn.

Add a scribbled shadow on the bottom of the tree line and the bottom of the grass in front of the barn. Trace the barn's wood panels. Add diagonal wavy lines to the sky.

Lightly parallel hatch the right part of roof and the side wall of the barn. Diagonally cross hatch the shadow on the side wall beneath the roof.

Again lightly parallel hatch the left part of the roof. Again, now from the different direction, cross hatch the shadow beneath the roof. Congratulations! You finished!
